

Cockroach treatment checklist

1. Do not use any other means of control, (bug bombs, aerosols, etc.) before or after our treatment as this could hamper the out come.
2. Please remove all items (silverware, dishes, pots and pans, open food, etc.) from your cabinets. You may place items in bags or boxes. Remove these items from the kitchen area for better work space for the technician.
3. Leave the small appliances (toasters, microwaves, coffee makers, etc.) on your counter. They need to be inspected and treated if necessary.
4. In the bathrooms, put away toothbrushes, water glasses, personal items, remove items from under sink unit. Once again place items in plastic bags or cardboard box
5. If there are Roaches in other rooms besides kitchen and bathroom please remove items away from baseboards.
6. Please have all children and pets toys put away. All pets food and water dishes removed from area and stored in plastic bags.
7. Please be patient, this process could take from 3 weeks to 2 months to eliminate a cockroach infestation, due to the biology of the cockroach.
